AUTOMATIC REAL - TIME MONITORING SYSTEM

Introduction

ARMS is a real-time monitoring system to track the attendance and tagging activities of security guard, cleaners and construction workers

ARMS consists of:

- A web based portal to manage the guards, locations, tagging points
- Android based Mobile app for the workers to do their attendance and tagging activities

ARMS uses NFC technology to ensure attendance and tagging process is unique and can't be duplicated at other sites

Features

Web Portal

- Manage clients information and location details
- Manage guards database and location assignment
- Manage tagging points and tagging schedule
- Monitor attendance and tagging activities
- Send notifications to workers

Mobile App

- Capture attendances
- Perform tagging activities
- Send site report
- Perform emergency function if unable to do tagging
